ABOUT KPR

Built on **Experience**. Driven by **Quality**.

OUR STORY

KPR Building Pty Ltd was established by industry professionals with decades of combined experience delivering some of South Australia's largest and most complex construction projects.

Prior to founding KPR in 2024, our management team held senior project management, commercial management and construction leadership roles within some of South Australia's leading concrete and infrastructure contractors. Collectively, this experience has contributed to the successful delivery of major infrastructure projects including the Torrens to Darlington (T2D) Project, Gallipoli Underpass, high-voltage electrical substations, regional hospital infrastructure, bridge structures and numerous large-scale commercial developments throughout South Australia.

KPR was founded with a simple objective: combine Tier 1 construction knowledge and systems with a contractor that clients genuinely enjoy working with.

We believe successful projects are built on proactive communication, transparency, practical problem solving and delivering what we promise.

Since our establishment, KPR has delivered projects directly and indirectly for Sarah Constructions, Jamtek Structural, Hot Property Group Homes and Sarah Homes.

CORE CAPABILITIES

Residential Construction

Commercial Construction

Civil Construction

Structural Concrete

Formwork

Reinforcement

Suspended Slabs

Excavation

Concrete Pumping

Project Management

Complete Residential Home Construction

OUR SERVICES

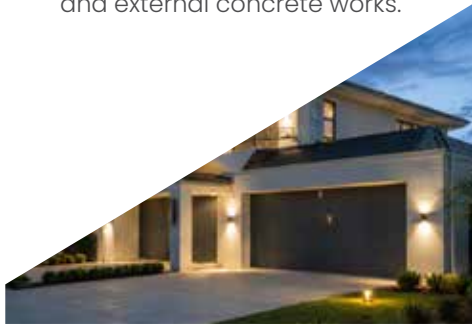

COMPLETE CONSTRUCTION SOLUTIONS

WHAT WE DELIVER

Residential Construction

Complete residential home construction, house slabs, waffle pods, raft slabs, footings, driveways, pathways and external concrete works.

COMMERCIAL CONSTRUCTION

Structural concrete packages including excavation, reinforcement, formwork, suspended slabs, Bondek installation, concrete placement and architectural concrete.

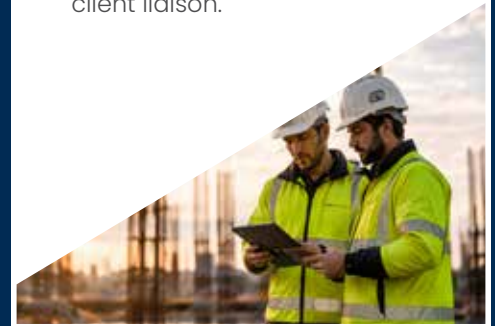

CIVIL CONSTRUCTION

Drainage structures, culverts, hardstands, pavements, retaining structures and public infrastructure.

PROJECT DELIVERY

Planning, procurement, programme management, QA, safety management, engineering coordination and client liaison.

» KPR provides end-to-end capability from excavation through to final handover.

FEATURED PROJECT

NORTH ADELAIDE AQUATIC CENTRE

Client: Sarah Constructions

KPR delivered over 700m² of exposed aggregate concrete pavements surrounding the outdoor pool precinct. The project required intricate placement around complex pool edges and a consistent exposed aggregate finish suitable for barefoot pedestrian traffic while maintaining premium architectural quality.

HIGHLIGHTS

700m²
exposed aggregate

Precision
architectural finish
